RECOMMENDED SURFACES

Unique outdoor cleaning with deepEX® Powerbrush

Paving stones and terracotta and concrete slabs have a high demand due to their good resistance. They are often used on the following exterior surfaces:

- ✔ Sidewalks
- ✔ Parkings
- ✔ Farms
- ✔ Entrances
- ✔ Places
- ✔ Patios
- ✔ Stadiums
- ✔ Schools
- ✔ Promenades
- ✔ Tree Borderings
- ✔ Parks
- ✔ Walkways

DAILY CLEANING + MAINTENANCE

deepEX® PowerBrush

These are surfaces with a filtration capacity. In other words, rainwater flows through the surface into the subsoil. In this way the environment is protected and the surface has an efficient drainage. However, this usually has a disadvantage.

Microorganisms can grow on porous surfaces. Water accumulates in the pores. This offers good conditions for the growth of mosses, algae, lichens, etc.

DEEPEX® + DUALTREAT® PAVING IMPREGNATOR - A WINNING TEAM!
Due to its powerful industrial diamond bristles, deepEX® PowerBrush eliminates stains and green growth in depth. Additionally, it is available in various grits, depending on the porosity of the surface. deepEX® PowerBrush is fully compatible with trowel machines and floor buffers.

Optimize your business - increase your earnings

Among our valued customers are companies from the following sectors:

- ✔ Construction Cleaning
- ✔ Basic Cleaning
- ✔ Road Sweeping
- ✔ Outdoor Cleaning
- ✔ Floor Cleaning
- ✔ High Pressure Cleaning
- ✔ Event Cleaning
- ✔ Facade Cleaning
- ✔ Street Cleaning
- ✔ Stables Cleaning
